

BOMANITE CON-COLOR STANDARD APPLIED TO UNCOLORED (GRAY) CONCRETE

Natural Gray

Cream

Autumn Brown

Sand

Forest Brown

Mexican Tile

Franciscan Red

Boca Pink

Brick Red

Chargreen

Nickel Gray

Sonora Tan

Caramel

Cobblestone Gray

Desert Tan

BOMANITE CON-COLOR EXOTIC APPLIED TO UNCOLORED (GRAY) CONCRETE

Barberry

Garden Pond

Tawny Peach

Sea Moss

Autumn Orange

Royal Lilac

Old Rose

Harper Blue

Barn Red

Harvest Wheat

Cobalt Blue

Deep Violet

Indigo Blue

Jet Black

Park Green

Limitations: The fifteen standard and fifteen exotic Bomanite Con-Color colors are shown to applied to a gray base. However, Bomanite Con-Color produces unique effects to each individual concrete substrate and may differ significantly from the colors shown on this chart. Bomanite Con-Color will produce a wide range of finished colors depending on many factors including, but not limited to, finishing techniques, mix designs, curing and sealing practices, age and condition of concrete in existing slabs, base color, and surface porosity. There is an element of uncertainty and unpredictability inherent in the use and final appearance of Bomanite Con-Color, including uneven, mottled or translucent effects. Also, concrete that has been extremely hard troweled may be difficult to stain. It is strongly recommended to sample the actual surface that is to be stained (in an inconspicuous area). Refer to the Bomanite Con-Color Technical Bulletin for additional information and product limitations.
